

Sayed Mohamed Sayed Farag

+20 109 682 1727 Cairo, Egypt sayedjr2020@gmail.com [sayed99mohamed \(Sayed\) \(github.com\)](#) [LinkedIn](#)

Profile Summary

Software Developer with 1 year of experience in developing scalable and maintainable applications, with skills in problem-solving, API integration, and performance optimization.

Experience

CodeAlpha Training Program — June 2026 – July 2026

Completed one month of Front-End Development training. • Received a Certificate of Completion.

QP Express (Nov 2023 - Jan 2024)

Contributed to several front-end development projects during a three months
Collaborated with the development team to implement features and improve user experience.
Utilized ReactJS to create and maintain user interfaces, ensuring responsiveness and cross-browser compatibility.

Micro Engineering (Sep 2024 – Jan 2025)

Developed and maintained ReactJS components for an AI-powered autonomous driving application.
Integrated APIs and resolved front-end issues to improve application performance and user experience.
Collaborated with cross-functional teams to deliver responsive and reliable user interfaces.

Education

Bachelor of Computer Science and Artificial Intelligence (English Program)

Helwan University | 2020 – 2024

Grade: Very Good with Honor degree (GPA:3.36 /4.00)

Backend .NET Development Course – Route Academy | Jun 2024 – Dec 2024

Completed a 6-month training program covering C#, ASP.NET Core, SQL Server, Entity Framework Core, and Web API development.

Projects

Stack Hub | Graduation Project (A+)

- Developed a programmer-focused community platform using **React.js**, enabling users to share knowledge, discuss technical topics, and collaborate on projects.
- Built responsive and dynamic user interfaces using modern React features, including **Hooks, Context API, React Router, and Component-Based Architecture**.
- Implemented **JWT Authentication and Authorization** to provide secure user login, registration, and session management.
- Integrated frontend components with **RESTful APIs** developed using **ASP.NET Core**.
- Developed core features including user profiles, post creation and management, community interactions, and content sharing.
- Optimized application performance and user experience through efficient state management and reusable components.

- Collaborated within a team environment using **Git/GitHub** and Agile development practices.
- Awarded **A+** as the Graduation Project.
- **Technologies:** React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, JWT Authentication, REST APIs, ASP.NET Core (Backend Integration), Git, GitHub.

- **E-Commerce**

- Developed a responsive e-commerce web application using React.js.
- Implemented user authentication features, including Register and Login.
- Integrated RESTful APIs to fetch and display product data dynamically.
- Designed a responsive user interface using HTML, CSS, and Bootstrap for seamless use across different screen sizes.
- Focused on improving user experience through efficient data handling and interactive UI components

- **Box Office**

- Developed a responsive movie web application using React.js.
- Integrated RESTful APIs to retrieve and display movie data dynamically.
- Implemented an interactive user interface for browsing movies, ratings, and categories.
- Ensured responsive design for optimal user experience across various devices.

Skills

- Frontend: HTML5, CSS3, JavaScript, Bootstrap, React.js, jQuery
- State Management: React Context API , Redux
- API Integration: RESTful APIs, Axios
- Database: SQL Server, SQL Queries, Joins, Stored Procedures
- Tools & Practices: Git, GitHub, npm, Responsive Design, Clean Code, Agile/Scrum
